B. GOAL/TARGET CERTAINTY

EXISTING PROCESS ASSESSMENT, GAP ANALYSIS, ROADMAPS
Objective, third-party reviews of safety-related processes. The identification of process and critical path gaps, and roadmaps for resolution focusing on these key areas:
- Plant/facility safety policy and process maturity level
- Benchmarking safety standards and areas for improvement
- Commitment to safety process, documentation, and compliance
- Effective safety risk management practices integration

“COLD-EYE” EXISTING PLAN REVIEW
Independent project plan reviews that drive successful goal achievement. Proven and experienced practitioners provide an objective assessment of:
- Project execution uncertainties
- Preparedness for startup
- Proper resourcing, staffing, and activity levels
- Systems, procedures, and materials
- Gap analysis and opportunities for improvement

LAGGING KPI MANAGEMENT
Improve the effectiveness of your safety process, boosting your achievement of safety targets. Define, track, and report on:
- Injury frequency and severity
- Near misses (frequency and trend)
- Fatality or other accidents
- Chemical releases
- OSHA/CALOSHA recordable injuries
- Lost workdays
- Worker’s compensation claims and costs
- Experience modifier rate and changes

ACHIEVING/EXCEEDING TARGETS
